

Globe Trio Semi Flush Mount Ceiling Light

Description

This semi-flush mount holds three frosted glass globes off a single horizontal black bar, two hanging below the bar and one sitting above it, staggered along the length so the arrangement reads as intentionally asymmetrical. The short central stem keeps the whole fixture close to the ceiling, avoiding the drop of a full pendant. It's built from a matte black painted metal frame with frosted glass globe shades, suiting a bedroom, hallway, or entryway. Perfect for adding contemporary character to compact spaces.
