

Travertine Arcus Cylindrical Pendant Lamp

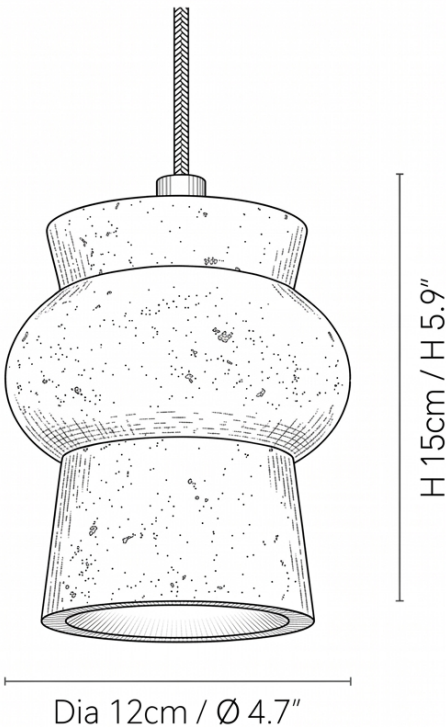

Travertine Arcus Cylindrical Pendant Lamp

Description

This sculptural travertine pendant carves a single block of natural travertine into a stacked, hourglass-like form, with a wider flared base tapering up through a narrower waist to a rounded shoulder near the cord. Since travertine is a natural stone, the surface carries its own pitting and mineral variation, so each pendant reads as a one-of-a-kind carved object rather than a uniform mass-produced shade. Finished in a yellow travertine tone through electroplating, polishing, and cutting processes, it's sized at Ø4.7" x H5.9" for ceiling mounting indoors. It suits a nightstand-height cluster, kitchen island, or entryway looking for a sculptural stone pendant instead of a glass or metal shade.

Drawing

Type	Pendant
Environment	Indoor Mounting
Dimensions [cm/in]	Dia 12cm / Ø 4.7" Height: 15cm / 5.9"
Light source	Standard: Compatible with E26 or E27 socket. Max 40W LED or Edison bulb (sold separately).
Finishes	Beige (Finish)
Construction material	Travertine, Metal.
Control Method	Push-Button Switch (Supports Bulb Dimming)
Voltage	AC 110-240V
