Product Installation Steps

Safety Regulations

WARNING: To prevent lamp damage, fall, electric shock, fire, and other potential safety hazards, please strictly follow the instructions for installation and use. Do not modify the lamp or replace components yourself.

Safety Precautions (Please read carefully before installation)

1. Disconnect power before installation.
2. The ceiling surface must support four times the lamp's weight. Cannot install on thin, soft, or unstable surfaces.
3. Do not install the lamp above heat sources or in damp places (to prevent corrosion, e.g., kitchen hoods, gas pipes, or near other vents).
4. Cannot connect other appliances to the circuit or use with a dimmer switch.
5. Inspection and maintenance of the lamp should be done by qualified personnel.
6. If the lamp has unusual behavior, immediately disconnect power and contact us.
7. If the external flexible cord or wire is damaged, contact us for replacement to avoid danger.
